## CYBER SECURITY

# HIGH NET WORTH INDIVIDUALS

You lock your doors. You make smart investments.
You protect against risk in the physical world.
What about online?

## OVERVIEW

In an era where cyber criminals are growing increasingly sophisticated, high net worth individuals (HNWIs) are prime targets across the globe. Your investments, assets, privacy and family's safety are paramount.

To keep you safe, we provide bespoke cyber security solutions, tailored to your unique needs, digital activity, and lifestyle.

**You and your family will gain enterprise-level cyber security, utilising cutting-edge technology to thwart malicious activities.**

At OneCollab, we go beyond mere task execution – we are your trusted allies, dedicating the time to deeply comprehend your personal needs. Our commitment lies in delivering tailored cyber security solutions meticulously aligned with your unique requirements.

## CHALLENGE

- Protecting digital assets from ransomware
- Securing mobile devices from unauthorised access
- Digital footprint management
- Minimising security risks from potential IoT vulnerabilities
- Family awareness of social engineering tactics
- Vulnerability to cyber attacks due to public visibility

**28%**
of HNWI's have experienced a cyber attack*

**72%**
of cyber attacks on HNWI's was due to phishing*

**62%**
of HNWI's don't have a cyber security plan in place*

*"Cyber-Attacks hit 28% of UHNW Families," Campden FB.

# Cloud, Data and Network Security

Our innovative SASE (Secure Access Service Edge) solutions simplify access optimisation and provide comprehensive protection for all critical networking and security requirements on a single platform.

From Secure Web Gateway (SWG) to Cloud Access Security Broker (CASB), Zero Trust Network Access (ZTNA), Data Loss Prevention (DLP), Cloud Firewall, and SD-WAN, we've got you covered.

## SOLUTIONS

### 1 Cyber Health Check

We begin with a meticulous assessment of your digital presence, identifying vulnerabilities and any potential risks.

### 2 Secure Hardware

Our experts ensure that all your devices, from mobile to desktop, are fortified with the latest security measures to deter threats.

### 3 Managed Cyber Security Services

Includes firewall management, security patch management, data loss prevention, and encryption.

### 4 Endpoint Detection and Response (EDR)

Advanced EDR solutions provide an additional layer of protection, ensuring rapid threat detection and containment.

### 5 Ransomware Protection

Our advanced measures shield you from the perils of ransomware, preventing potential data loss and financial setbacks

## 24/7 Support and Monitoring

With our services, your cyber assets are continually under watch, enabling us to swiftly identify and counter threats in real-time.

Our vigilant approach guarantees not just proactive defence but also adaptability. By staying ahead of potential threats, we empower you to concentrate on expanding your wealth and safeguarding your personal data, unburdened by the persistent threat of cyber attacks.

## GET SECURED TODAY

Cyber attacks can happen to anyone, but you can shield yourself from becoming a statistic. With OneCollab as your trusted partner, you'll safeguard what's most important and gain control over your security risks. Our experts are just a call or tap away. Contact us to seize control of your cyber future.
